

## PROJECT SHEET 41

### MALI

**Title:** Analysis and capitalization of situation by GERES (based on some operators, minigrids)-  
(CZZ1910 09)

**Amount:** 25k€

Category: SE4All Off-grid TA

Request from: AMADER

### Context

GERES has managed several NGO projects related to minigrids and energy access in general in Mali, in coordination with AMADER. Taking stock of these and estimating the parameters that allowed (or prevented) the smooth deployment of these projects will provide valuable inputs for designing future rural electrification projects.

### Technical assistance

The technical assistance aimed at:

- Analyzing the technical choices and an analysis of the operational state of key sites
- Analyzing the economic models developed on these sites
- Describing of a few functional sites: observable and reliable characteristics, within a geodatabase

### Status & impacts

*Completed in November 2018*

- Feedback on operational modalities, and local buy-in
- A validated learning process that can be further applied in a systematic way in Mali

**Final report available on request.**

Co-financed by the European Union and the  
Agence Française de Développement

**A facility to develop innovative projects in renewable energy and boost electrification on the African continent.**

The AFD Group, with the support of the European Union, has set up the "African Renewable Energy Scale-Up facility" (ARE Scale Up facility) to boost private sector investment in on-grid and off-grid renewable energy production in Africa.
