Digital Technology

AFD GROUP'S ACTIVITY

2021-2023

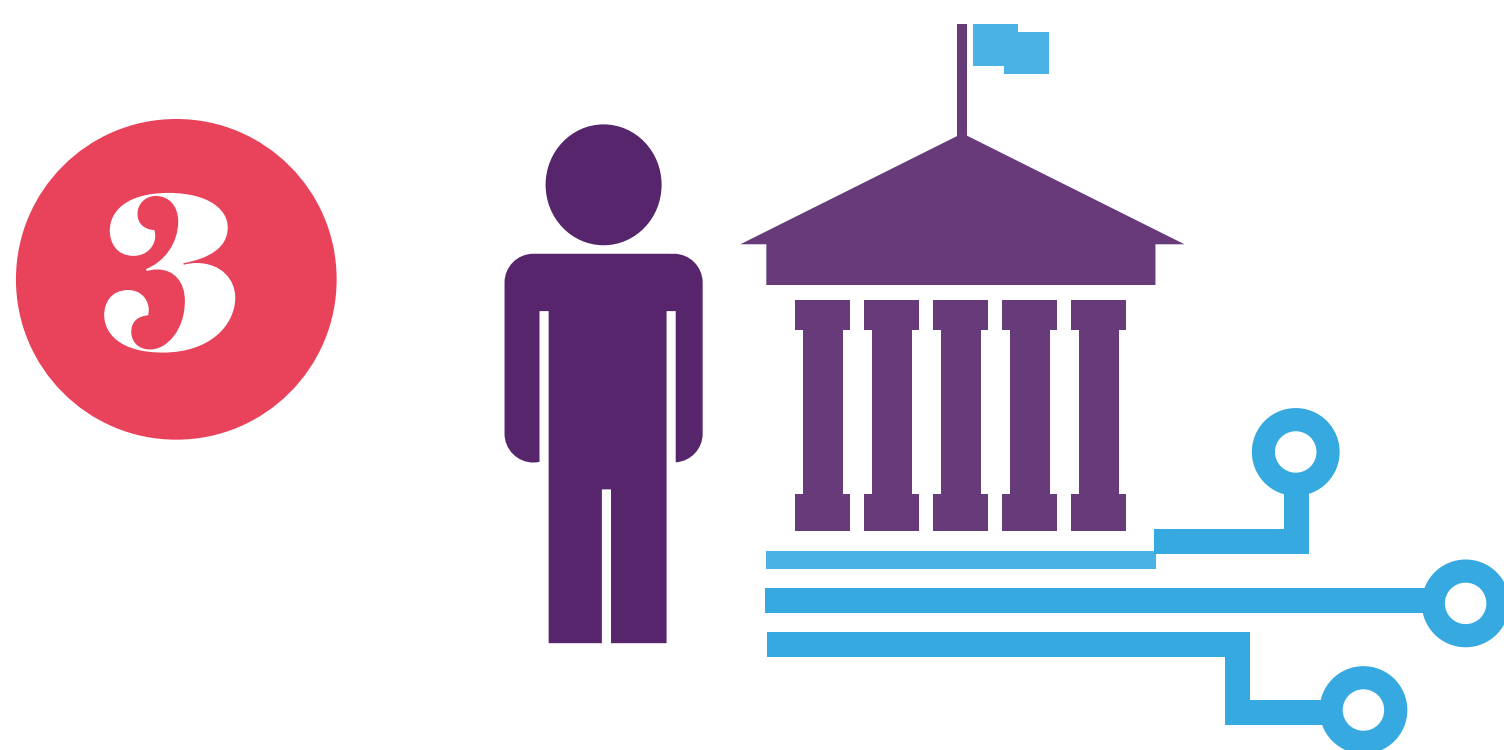

The 3 levers of our digital transition strategy

Reconciling
climate, nature
and digital
development

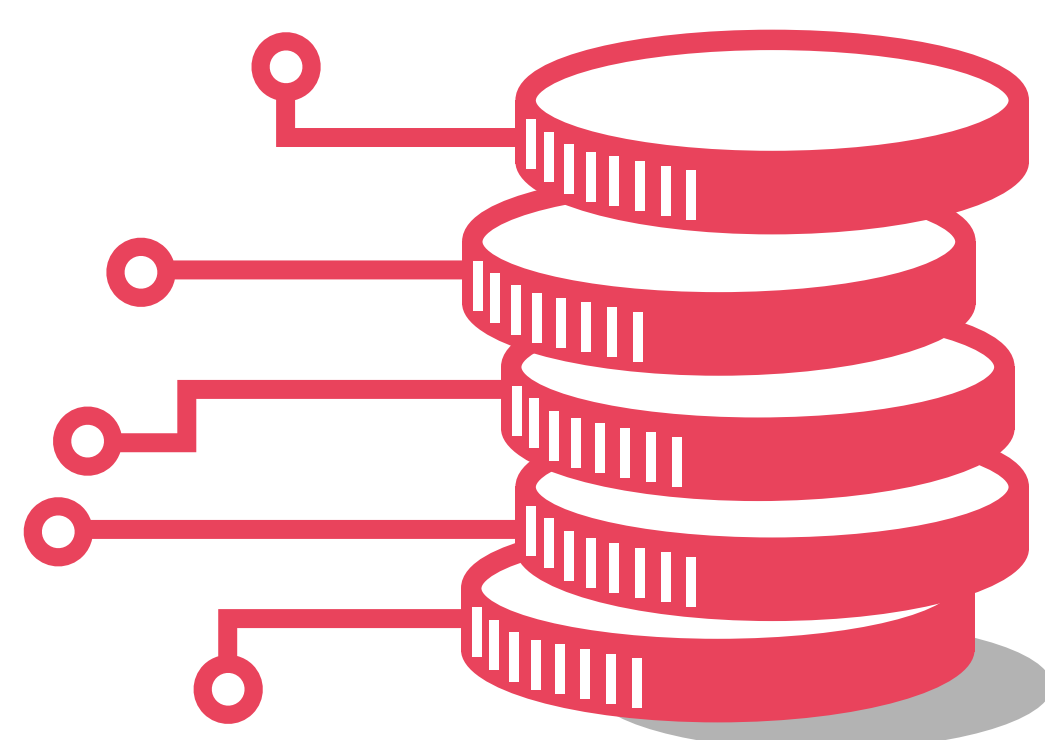

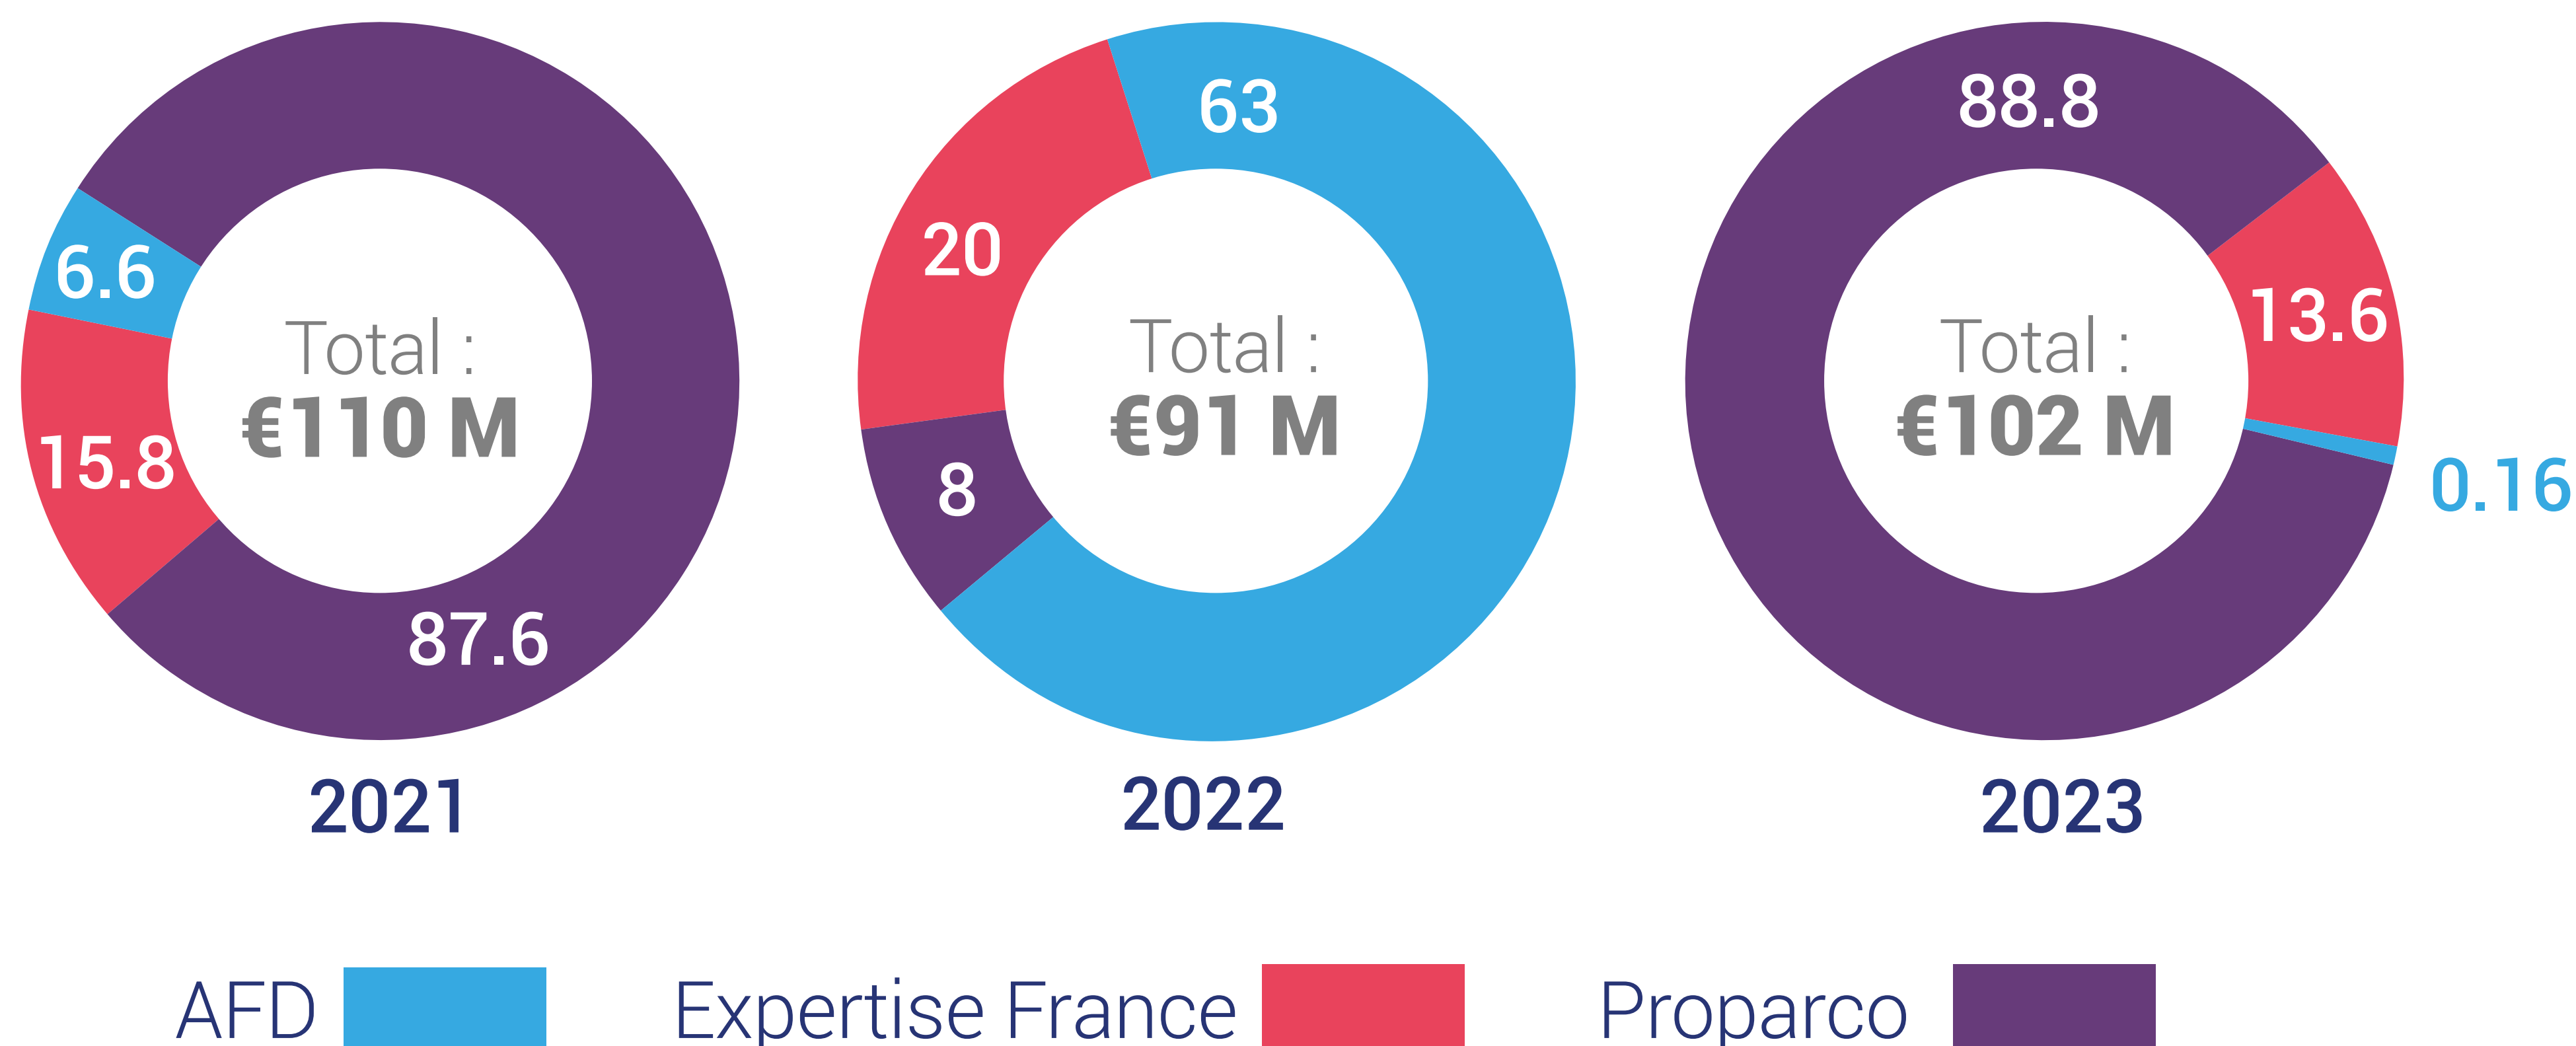

Improving
equality and inclusion
in the access to and use
of digital technology

Positioning
citizens and their rights at
the heart of the governance
of digital spaces

intelligence

Total : €1.5 M

Digital technology, a key lever for accelerating development trajectories

77%

of the financial volumes committed by AFD Group between **2021 and 2023** target internet access and services, in line with SDG target 9.C.

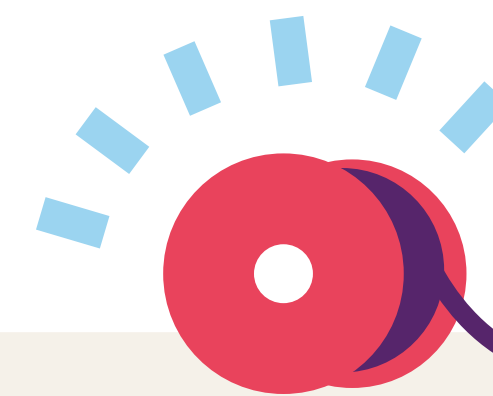

9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE

1,702 telecom towers
and

2,177 relay antennas

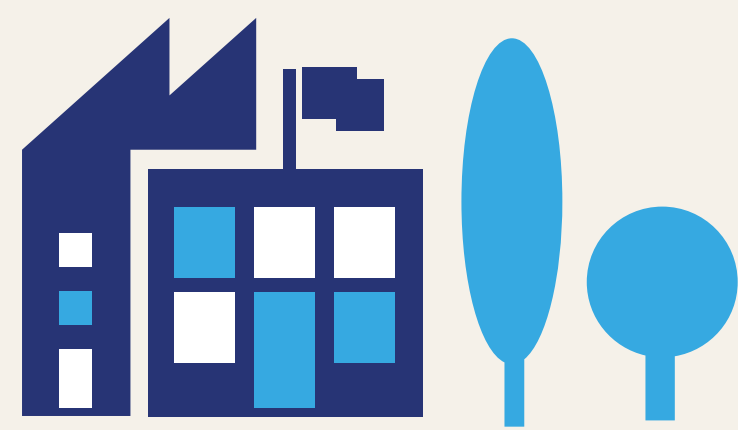

will be built as part of
projects committed during
the 2021-2023 period.

1,470 km

of fiber-optic cables will be deployed.

2,087

organizations and institutions

are supported by AFD Group
in the use of digital technology
and the digital transition.

4.4 million people

will enjoy new or improved access to the internet*
a transformative technology that is crucial for accelerating
the progress of all 17 SDGs, with no exception.

** including 4 million domestic subscribers who see their access latency improved thanks to support for a large-scale "wholesale" operator in Africa.*

AFD Group digital technology projects under implementation

89
projects
under implementation
involve the digital sector,
including:

55

Expertise France projects
significantly or mainly
targeting digital
transformation

21

AFD projects
and 13 Proparco projects
targeting the sector

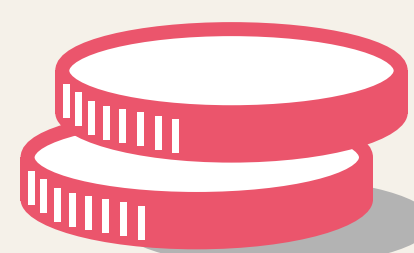

The volume of commitments under implementation by AFD Group:

€116.7 M in commitments by AFD
under implementation

€253 M in commitments by Proparco
under implementation

€50 M in turnover under implementation
for Expertise France
