Energy Transition

OUR ACTIVITY

2024

Ambitious and country-specific energy trajectories are key drivers for addressing the climate, social and economic challenges facing the world today. AFD Group mobilizes its full range of financial and technical tools to support them. Its strategy is tailored to each country's specific situation and is based on three priority actions, with three cross-functional levers.

3 areas of operation

Universal access
to energy services

Demand
management
and energy
efficiency

Modernized
and low-carbon
energy supply

3 acceleration levers

Support public
policies for
energy transition

Mobilize
and strengthen
stakeholders

Support
innovation

€2.5

BN

**committed
to 85 projects,**
representing 19%
of AFD Group's total
commitments.

Our contributions to the Sustainable Development Goals (SDGs)

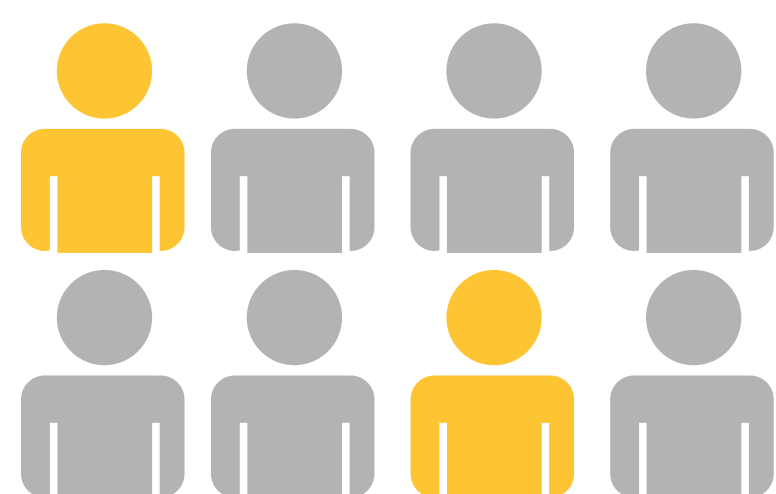

30,000 people will obtain access to sustainable electricity services.

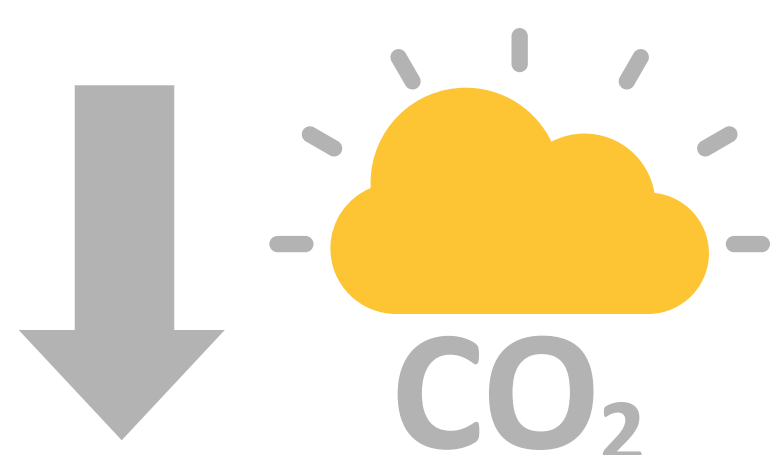

66% of energy-related commitments (representing €1.6 BN) will have a positive impact on gender equality.

2,225 MW of renewable energy generation capacity will be installed.

400,000 people will benefit from better quality electricity services.

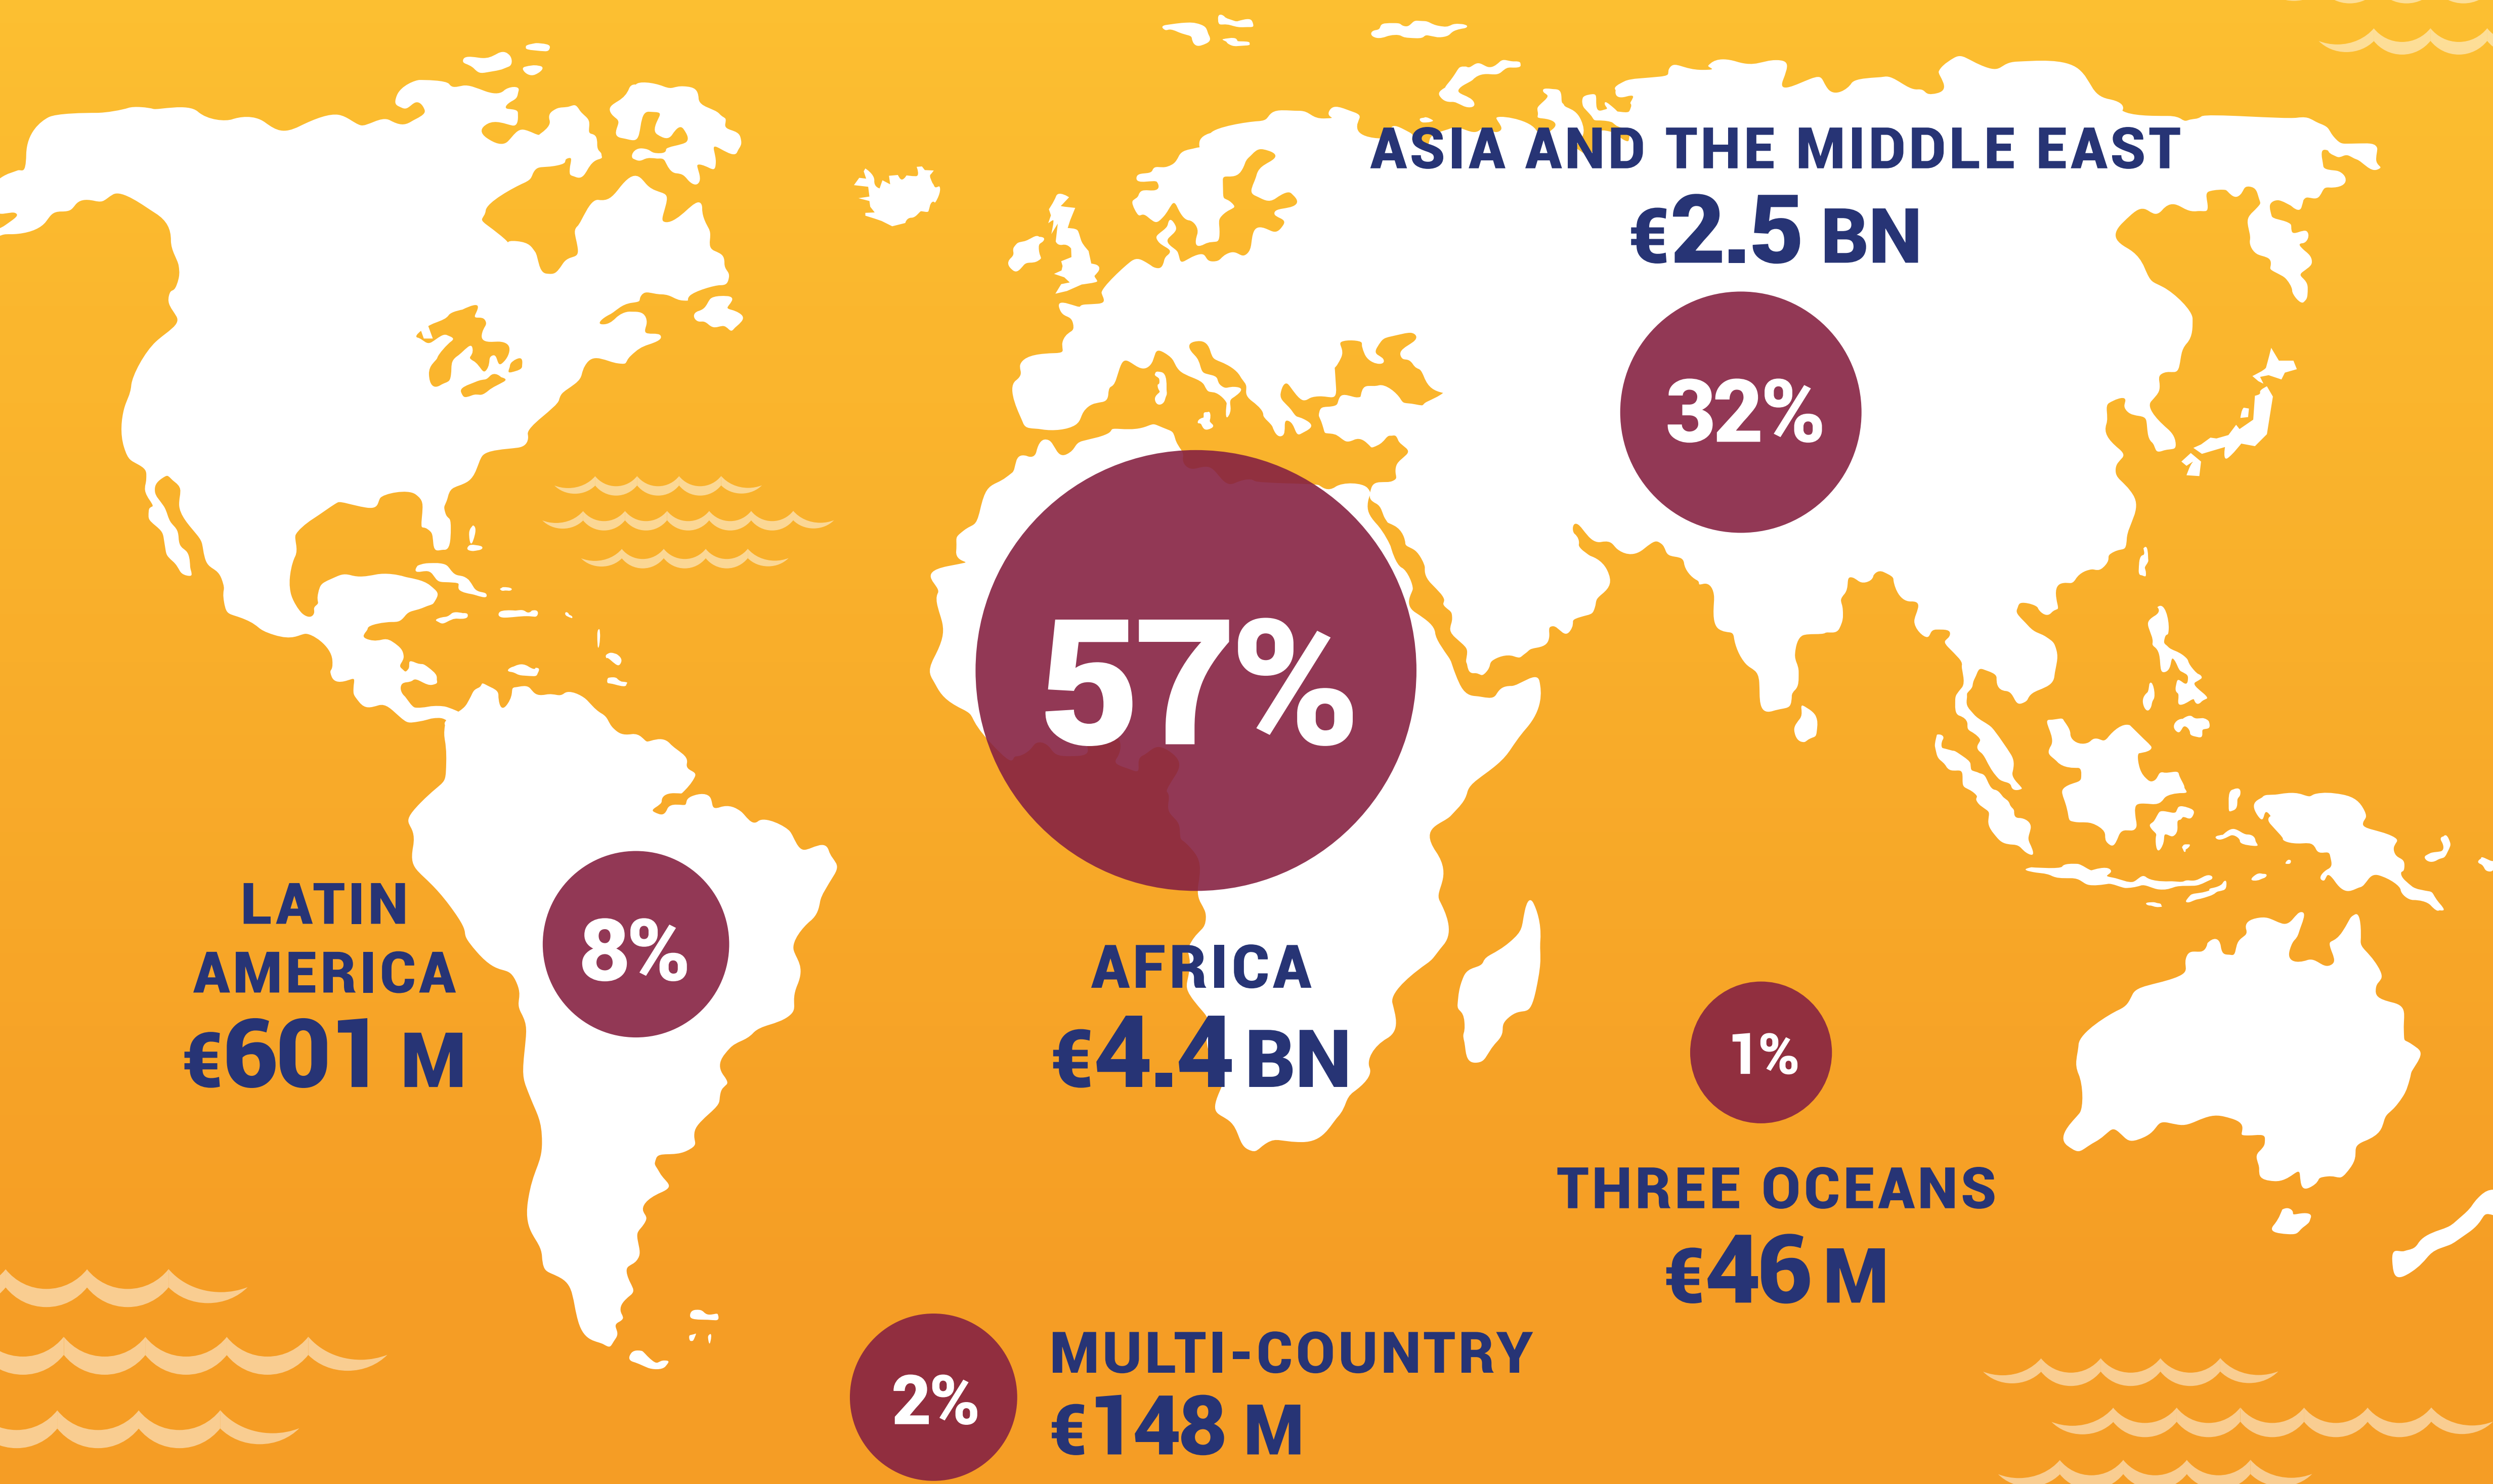

2.8 million tonnes of CO₂ avoided, helping to reduce greenhouse gas emissions.

86%

of commitments (representing **€2.1 BN**) also have benefits for the climate.

Projects in progress

Breakdown by region (% of total commitments in 2024)

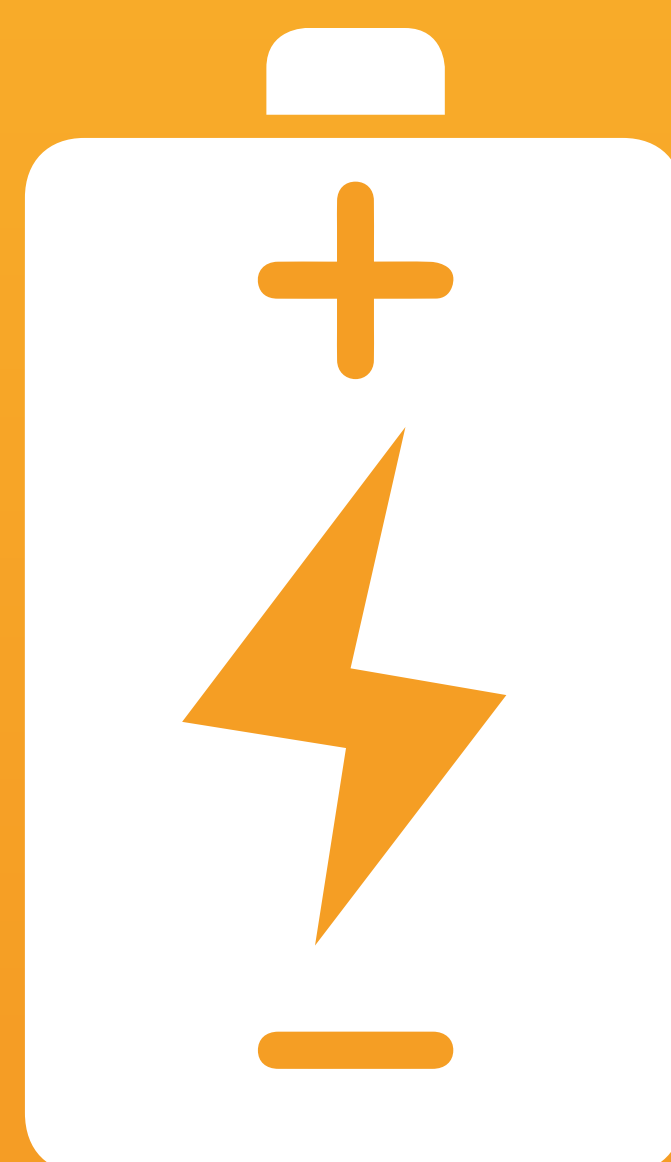

233 projects in progress
as of 31 December 2024
within AFD's Energy division.

Total financing of **€7.7 BN**
of which €5.2 BN is yet to be disbursed.

Impact of projects completed in 2024

361,000

additional people have access to sustainable electricity services

125 MW

of new
renewable
energy
capacity
installed
